School District Areas of Improvement and Planning - Indicators

Suspension/Expulsion by Race/Ethnicity (Indicator 4B)

Indicator not flagged at this time.

Disproportionate Representation by Race/Ethnicity (Indicator 9)

Indicator not flagged at this time.

Disproportionate Representation by Race/Ethnicity/Disability (Indicator 10)

Indicator not flagged at this time.

Timely Initial Evaluations (Indicator 11)

Indicator not flagged at this time.

Secondary Transition (Indicator 13)

Indicator not flagged at this time.

Graduation (Indicator 1)

Improvement and Planning Activity
Ongoing meetings with principals and Asst. Supt to discuss Sp Ed graduation rates, conduct root cause analysis, and strategize corrective measures
Share data with Instructional Support Team to gather further input; review progress monitoring data of students targeted for attendance, behavior, and academics to ensure appropriate placement and level of support.
Consider graduation of students based on IEP goal progress under certain conditions: number of credits in core academic areas, needs around family support, post-secondary career plan, etc.

Drop Out (Indicator 2)

Improvement and Planning Activity
Ongoing meetings with principal and Asst. Superintendent to discuss Sp Ed drop out rates, conduct root cause analysis, and strategize corrective measures
Share data with Instructional Support Team to gather further input; review progress monitoring data of students targeted for attendance, behavior, and academics to ensure appropriate placement and level of support.
Increased collaboration between regular and special education teachers to address needs of targeted group (Itinerant Learning Support) with highest drop out among disability categories
Address attendance issues as data analysis indicates students with highest drop out rate also have lowest attendance.

Assessment (Indicator 3)

Indicator not flagged at this time.

Education Environments (Indicator 5)

Improvement and Planning Activity
Institute monthly attendance forms to ensure accurate data reporting
Enhance professional development around differentiation of instruction for regular and special education staff
Enhance professional development around the implementation of co-teaching models

Parent Involvement (Indicator 8)

Indicator not flagged at this time.

Early Childhood Transition (Indicator 12)

Indicator not flagged at this time.

Post-School Outcomes (Indicator 14)

Improvement and Planning Activity
Conduct home visits to encourage survey participation
Enhance outreach through district website, social media campaign, offer incentives
Leverage Safe Harbor case managers to help connect with graduates, particularly when they have younger siblings receiving services

Resolution Sessions (Indicator 15)

Indicator not flagged at this time.

Mediation (Indicator 16)

Indicator not flagged at this time.

School District Areas of Improvement and Planning - Monitoring

District has completed all monitoring corrective action/improvement plans.

Identification Method

Identify the District's method for identifying students with specific learning disabilities

Discrepancy Model

Building Name	AUN	Branch Number	RTI	Approved RTI Use
---------------	-----	---------------	-----	------------------

Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

Yes

24 P.S. §1306 facilities				
Facility Name	Facility Type	Facility Type: Other	Services Provided By	Total Students in Facility
Perseus House	Resident Treatment Facility		Licensed Private Academic	41

1. Describe the host’s educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

In order to meet it's obligations under Section 1306 of the Public School Code, the LEA subcontracts with outside providers for educational and related services, including Perseus House and the Northwest Tri County Intermediate Unit #5. The district ensures that students are receiving FAPE in the least restrictive environment by providing for supervision of special education programming and caseload management by the district's special education supervisory staff; as well as by maintaining close and frequent communication with the provider staff, monitoring staff credentials and it's implementation of IEP supports and services. Each non-resident student's IEP is reviewed by a multidisciplinary team that includes the student's parent or guardian to ensure that the student is being provided with appropriate services in the least restrictive environment. Any problems or barriers that exist which limit the District's ability to meet it's obligations are mostly related to failure to receive records in a timely manner from home school districts. In these cases, the LEA exercises it's child find obligations to ensure supports and services to eligible students.

2. Describe the district’s procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

The district Special Education Supervisor remains in close communication and regularly meets with the 1306 provider agency staff to ensure that students are being educated in the least restrictive setting and also communicates with the parent and host district to ensure a successful transition back to the home district.

Incarcerated Students Oversight

1. Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?

Yes

§1306.2 Facilities			
Facility Name	Facility Type	Services Provided By	Student Count
Erie County Prison	Adult Correctional Facility	District	11

1. Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).

School District's that have a prison within their geographic boundary are required to educate youth who are awaiting trial and students that are eligible for Special Education services until the age of 21. The Erie School District has an agreement with the Erie County Prison that has been in place since 1998 fulfilling this obligation. A supervisor of Special Education from the Erie School District is responsible to oversee the entire process and to coordinate with the district's special education teacher assigned to the prison. All inmates under the age of 21 who have not graduated are offered educational services in compliance with basic education regulations. The Erie County Prison implements a basic intake procedure and for all inmates. This intake information is electronically added to the prison data base. The Special Education teacher has access to this data base as part of the agreement with the Warden of the prison and the Chief of Correction Officers. The teacher does a follow up meeting with the inmate in his or her living space, requesting and securing permission to educate. At this time, additional forms are completed and further information is requested to assist with each new students education. The evaluation needs of the inmate are also determined. The Erie School District has a process in place to complete psychological evaluations to ensure that all data for the inmate remains in compliance. It should be noted that at the original prison intake many new inmates reject education due to the stress of the incarceration ordeal, however, the personal interview done by the teacher the following day usually is more successful in securing a positive response for participation.

Least Restrictive Environment

1. **Review the district's most recent data for Least Restrictive Environment. Highlight areas of improvement.**

Per the 23-24 SEDR report of August 2024, the district has met target in the area of SE inside the regular education class 80% or more of time and has met target in the area of SE in other settings. Our percentage of SE inside the regular class < 40% has shown some regression to 16.9%. This is likely due to changes in the population in the area with an influx of immigrant students with very significant multiple disabilities.

2. **What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?**

The district utilizes the Student Assistance Program to address both academic and social/emotional needs of all students in need of accommodations to their learning environments. A multidisciplinary building level team meets to discuss the student's challenges, barriers to success both academically and socially, strategizes interventions, ensures implementation and reviews data to determine effectiveness and/or need for plan changes. There is also an intervention time built into the daily schedule.

3. **Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.**

Regular and special education teachers are trained in the district's curriculum initiatives and are provided co-planning time during daily PLCs. Co-teaching has been prioritized as a district level training area to ensure meaningful participation of students with disabilities in the general education curriculum, and a greater emphasis has been placed on the training of general education teachers around supporting students with special education needs in their classrooms.

4. **Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.**

The LEA utilizes a variety of supplementary aids and services including collaboration between regular and special education teachers as described in #3. Also, the LEA ensures the development and delivery of instruction addressing diverse learning needs by providing modified curricular goals, methods of presentation, and materials. Assistive technology and adaptive equipment are incorporated into lesson planning for students utilizing high and/or low technology and instructional adaptations such as pre-teaching are utilized to ensure meaningful participation of special needs students in the general education curriculum. School wide positive behavior supports are implemented as well as individual behavior support plans, and counseling supports. A continuum of support is provided to students with disabilities to allow them access to and meaningful participation in extracurricular activities up to and including the provision of the aforementioned accommodations and modifications, but also additional staffing or one to one aide support as deemed necessary.

5. **Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?**

The Barber National Institute is an APS that provides services to students with special needs, so there are limited opportunities for referred students to be educated with non-disabled peers. All resident families are however invited to participate in district lead extracurricular activities and have access to the district website providing information regarding these activities as well as events like meal distribution and provision of technology resources. At the Western PA School for the Deaf Elementary and Middle School students have the opportunity to attend classes at local private schools or their home school district, provided they meet specific criteria and an appropriate opening exists in the mainstream program. SAT and PSSA scores, along with other data, are considered in the decision to mainstream a student. Upon agreement at a student's IEP, High School juniors and seniors have the opportunity to attend

classes in their home school district or an off-campus vocational training program. Students in the vocational training program must demonstrate a unique interest in a vocational area for which training is not provided by WPSD and must have a high likelihood of using these skills upon graduation.

6. **Discuss the district’s need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)**

In recent months, the district has found that it has become more difficult to place high level need students in out of district placement due to capacity issues. The district has expanded in-house programming to service students who may previously have been referred to an out of district placement, and is contracting with home health care providers to support students with significant medical needs.

Out of District Placements

Facility Name	Facility Type	Other	Operated By	Service Type	Number of Students Placed
Elizabeth Lee Black School	Approved Private School (APS)		Barber National Institute	Multiple Disabilities Support	57
Western Pennsylvania School for the Deaf	Approved Private School (APS)		WPSD	Deaf and Hard of Hearing Support	2

Positive Behavior Support

Date of Approval

2017-11-15

Uploaded Files

Behavior Support Policy.113.2.pdf

1. How does the district support the emotional, social needs of students with disabilities?

The district supports the emotional and social needs of students with disabilities primarily via the IEP process including functional behavior assessment and development of positive behavior support programming. Students with IEPs are also afforded the same Mental Health service provisions as other students through the Student Assistant Program which may result in either on site mental health support or referral to an outside provider who will work in collaboration with the school team. Through PBIS, all school district students also have universal/Tier 1 access to a social-emotional learning curriculum.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

Professional development is provided to staff in the area of functional behavior assessment and developing positive behavior support plans. Training is provided through certified instructors of Handle With Care (HWC). HWC training develops skills in the area of preventative techniques, de-escalation techniques, and intervention techniques for the management of significant student behaviors. Handle With Care focuses on relationship building and teaches staff how to respond in a crisis to effectively deescalate students involved in a behavioral/emotional crisis. Verbal de-escalation is an integral piece of the Handle With Care training. Intervention at this level requires accurate observations of the individual early in the crisis and immediate intervention before the crisis escalates. The primary goal of intervention at this level is to help the individual articulate his/her feelings/self observations and channel his/her tension towards appropriate problem solving behaviors. Modes of intervention at this level include: Listening: Allowing the individual to ventilate verbally without becoming defensive or reactive. Being willing to help the individual assert him/herself in a given situation or correct an injustice. Accept: The validity of the feeling if not the behavior. Focus: On one issue at a time. Encourage: Assertion as opposed to aggression. Offer: Alternative choices the individual can make. Contract: Agree on a course of action and follow through as if it were a contract. The policy on the use of restraint and/or therapeutic hold with students is only considered a measure of last resort, only to be used after other less restrictive measures such as de-escalation techniques are used and the student poses a danger to himself or others.

3. Describe the district positive school wide support programs.

The District provides professional development through trained members of the IU 5's team on Schoolwide Positive Behavior Support. A number of administrators, teachers, and support personnel participated in cohort training in order to become familiar with the tenets and of SWPBS and learn how to successfully implement the strategies in our schools. These individuals will now be able to support other school teams in SWPBS implementation efforts. Due to the success of these programs, the district is now requiring all schools to implement some system of school wide positive behavior supports. The district's PBIS program is supported by the IU5 and aligned with PDE Bureau of Special Education and the Pennsylvania Training and Technical Assistance Program School Wide Positive Behavior Supports. All sixteen of the district school's are currently implementing Schoolwide Positive Behavior Supports.

4. **Describe the district school-based behavior health services.**

The Student Assistance Team is charged with identifying student strengths and needs, and working with the child and family to identify and access the necessary supports that will help each referred child to become more successful in school. Mental Health Specialists are available to consult with students referred through the Student Assistance Team and facilitate referrals to community agencies when appropriate. All Student Assistance Mental Health Services are confidential, voluntary and free of charge. Specific Services offered by SAP Mental Health Specialists: • Consultation to Student Assistance Teams • Mental Health Assessments with referred students (K – 12) • Behavioral Assessments • Crisis Assessments and Consultation • Critical Incident Response • Short-term counseling • Situational intervention and mediation services • Direct referrals for county funded mental health services • Referrals to community agencies • After-care and transition support services • Consultation with school staff and administrators • Consultation regarding social skills training and other school-based intervention and prevention programs • In-services/presentations to school staff and students • Participate in Child Family Teams of the Erie County Wrap-around Initiative • Group facilitation including: Anger management, stress management, grief and loss, relationships/communication, problem solving, social skills and transition. The district also contracts with Family Services of Erie for behavioral health services to provide additional on-site access to behavioral assessment and intervention services. The district also collaborates with community behavior health service providers of the parents' choice and provides classroom access to Behavioral Health Technicians, Blended Case Managers, and Behavior Specialist Consultants under the district's third party provider policies to ensure continuity of services between home and school.

5. **Describe the district restraint procedure.**

District staff are trained in Handle With Care, a crisis prevention and intervention program that is trauma informed that primarily emphasizes relationship building and verbal de-escalation techniques. As a last resort, in circumstances that involve eminent danger to self or others, physical restraint procedures are implemented only by staff who have been trained in the appropriate techniques to avoid injury to students and staff.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

The district has historically been able to meet the needs of students from all disability categories as we offer a full continuum of services for students with disabilities. The district remains fortunate to be located in a county that realizes excellent interagency collaboration, allowing us to subcontract for services from the Approved Private School, the IU5, or other providers located in our area when deemed necessary to provide appropriate educational supports and services for our students with the most severe needs. The district also collaborates with interagency service planning teams and works closely with the service provider chosen by the parent of the student on the development of treatment goals and interventions. There has been a significant increase in the number of students with mental health needs, as well as an influx of students with multiple disabilities from other countries as Erie City is a targeted refugee resettlement area. This has challenged the capacity of all providers of educational, behavioral, mental health supports, and health care services in the area, making servicing students with significant needs more of a challenge. We continue to work collaboratively both internally and with our community support providers to ensure timely and appropriate services to our students and families to the greatest extent possible, and have contracted with health care providers in the area to provide the supports students with intensive medical needs require to access FAPE.

Positive Behavior Support

Description of Training			
Ukeru - model that teaches staff members how to safely manage crisis situations (behaviorally) with the least restrictive approach possible. Ukeru training covers communication techniques and how we can better communicate with our clients, what trauma informed care looks and feels like, conflict resolution, and how to comfort our students and not control them.

6	3	District Other	Paraprofessionals Special Education Teachers

Description of Training			
Handle With Care - Provided annually, HWC is designed to train staff on safely managing behaviorally challenged children and adults, including those with disruptive, aggressive and self-destructive behaviors. The program teaches staff to develop and use their management and relationship skills to reduce tension, and create and maintain a calm and safe environment for all. This verbal de-escalation and physical management program includes a patented restraint technique that is designed to be effective, safe and require fewer staff to safely manage a crisis as a last resort option.

- There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
