This class is designed to help you academically. Throughout the year, we will review important concepts that you can use in your other classes. We will create goals for your academic career. You will need to complete a daily writing assignment, and I will work with you to do well in your other classes.

Grading: You will be graded on a points system. Your grade will consist of:

- **Behavior Points:** It is my job to provide you with the skills that you will need after high school. How you treat others has a bearing in how you do in school and in life. The sooner you practice and master positive ways to act around others, the better you will be.

You have the opportunity to earn up to 5 points during each class. You will earn these points by:

Come to class on time (1 point)
